1. Definitions and Terminology

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in RFC 2119 [RFC2119].

The following definitions are used in this document:

Definition	Description
Federation	Identity Federation TIDF is an association of organizations that come together to exchange information, as appropriate, about their users and resources in order to enable collaborations and transactions.
Federation Member	An organisation that has joined the Federation by agreeing to be bound by the Federation Policy in writing.

Definition	Description
Federation Operator	Organisation providing the infrastructure for Authentication and Authorisation to Federation Members.
Federation Policy	A document describing the obligations, rights and expectations of the federation members and the federation Operator.
Entity	A discrete component that a member wishes to register and describe in metadata. This is typically an Identity Provider or Service Provider.
Registry	System used by the Federation Operator to register entity metadata. This may be via a self-service tool or via other manual processes.
Registered Representatives	Individuals authorised to act on behalf of the member. These may take on different roles with different rights attached to them.

2. Introduction and Applicability

This document describes the metadata registration practices of the Federation Operator with effect from the publication date shown on the cover sheet. All new entity registrations performed on or after that date SHALL be processed as described here until the document is superseded.

This document SHALL be published on the Federation website at: https://tidf.tj/wp-content/uploads/2019/11/TIDF_AAI_MRPS_en.pdf

3. Member Eligibility and Ownership

Members of the Federation are eligible to make use of the Federation Operator's registry to register entities. Registration requests from other sources SHALL NOT be accepted. The procedure for becoming a member of the Federation is documented at: https://tidf.tj/?page_id=16

The membership procedure verifies that the prospective member has legal capacity, and requires that all members enter into a contractual relationship with the Federation Operator by agreeing to the Federation policy and sign Terms of Service Agreement with appendices.

The membership process also identifies and verifies Registered Representatives, who are permitted to act on behalf of the organisation in dealings with the Federation Operator. Verification is achieved by checking power of attorney of Representative, signed by Manager mentioned in The Charter of organization.

The process also establishes a canonical name for the Federation member. The canonical name of a member MAY change during the membership period, for example as a result of corporate name changes or mergers. The member's canonical name is disclosed in the entity's SAML v2.0 <md:OrganizationName> element.

4. Metadata Format

Metadata for all entities registered by the Federation Operator SHALL make use of the [SAML-Metadata-RPI-V1.0] metadata extension to indicate that the Federation Operator is the registrar for the entity and to detail the version of the MRPS statement that applies to the entity. The following is a non-normative example:

```
<mdrpi:RegistrationInfo registrationAuthority= "https://tidf.tj/"
registrationInstant= "2019-11-20T13:39:41 Z"> <mdrpi:RegistrationPolicy
xml:lang="en"> https://tidf.tj/wp-content/uploads/2019/11/TIDF_AAI_MRPS_en.pdf</
mdrpi:RegistrationPolicy>
</mdrpi:RegistrationInfo>
```

5. Entity Eligibility and Validation

5.1 Entity Registration

The process by which a Federation member can register an entity is described at: https://tidf.tj/?page_id=21

The Federation Operator SHALL verify the member's right to use particular domain names in relation to entityID attributes.

The right to use a domain name SHALL be established in one of the following ways:

- A member's canonical name matches registrant information shown in WHOIS.
- A member MAY be granted the right to make use of a specific domain name through a permission letter from the domain owner on a per-entity basis. Permission SHALL NOT be regarded as including permission for the use of sub-domains.

5.2 EntityID Format

Values of the entityID attribute registered MUST be an absolute URI using the http, https or urn schemes.

https-scheme URIs are RECOMMENDED to all members.

http-scheme and https-scheme URIs used for entityID values MUST contain a host part whose value is a DNS domain.

5.3 Entity Validation

On entity registration, the Federation Operator SHALL carry out entity validation checks. These checks include:

- Ensuring all required information is present in the metadata;
- Ensuring metadata is correctly formatted;
- Ensuring protocol endpoints are properly protected with TLS / SSL certificates.

5.4 Different requirements

All Identity Providers' metadata:

- MUST contain an <md:Organization> element, where:
 - o <md:OrganizationName> MUST reflect the canonical name for the Federation member
 - o <md:OrganizationDisplayName> MUST be present and SHOULD reflect a shortened version of the canonical name for the Federation member.
- <md:OrganizationURL> MUST contain the Federation member's web site address.
- MUST contain at least one <md:ContactPerson> of contactType="technical" and SHOULD contain one of contactType="support". Where <md:EmailAddress> is given this SHOULD be a role account rather than an individual.
- SHOULD contain an <mdui:UIInfo>, with at least the following elements set:

- o `<mdui:DisplayName>` — meaningful name for the identity provider.
-

6. Entity Management

Once a member has joined the Federation any number of entities MAY be added, modified or removed by the organization.

6.1 Entity Change Requests

Any request for entity addition, change or removal from Federation members needs to be communicated from or confirmed by their respective Registered Representatives.

Communication of change happens via e-mail.

6.2 Unsolicited Entity Changes

The Federation Operator may amend or modify the Federation metadata at any time in order to:

- Ensure the security and integrity of the metadata;
- Comply with interFederation agreements;
- Improve interoperability;
- Add value to the metadata.

Changes will be communicated to Registered Representatives for the entity.
